Project Proofing Terms:

Once your Recipe Analysis has been worked up, you will receive a proof including a full nutrient sheet with which to view the values before proceeding. One round of changes to the project are included in the initial setup cost. At this time, you will be able to correct any errors, or make changes to your recipe (i.e., if fat grams or sodium are too high you may want to adjust your recipe. Energy Enterprises will give suggestions, upon request, in regard to making revisions to your recipe to meet product goals.) Two recipes adjustment can be made prior to approval with out incurring any additional costs. If more than two changes are made a fee of \$ 15.00 will be applied for each recipe change prior to final approval. If any additional changes are requested *after* the Analysis has been approved, an additional fee of \$35.00 will be incurred. The \$35.00 fee will be multiplied for each additional round of changes that occur *after* approval. In the interest of saving time and money for both parties, please take care to ensure the recipe is accurate and proofed well. If changes are requested *after* the final label has been produced, a fee of \$45.00 per label will apply.

FINAL LABEL REVIEW of Nutrition Facts Label Only – US & International:

This is an additional service that is highly recommended for ensuring accuracy of your final product packaging. Energy Enterprises offers a Final Label Review, that is, to review the Nutrition Facts Label after it has been placed onto the packaging by the graphic designer and/or printer – before printing occurs. Unfortunately, there have been numerous occasions when the Nutrition Facts Label is altered in one way or another, intentionally or unintentionally, and the packaging goes to print incorrectly. To avoid this costly mistake, it is advisable to request a Final Label Review. You may save money by ordering the PACKAGE RATE listed on the above form, which includes this service.

International Labels:

A Full Label Compliance Review is recommended for all International Labels. This service includes a review of the Nutrition Facts label, ingredient statement, weights and measures, manufacturer contact information and placement information. This service is listed in the above form.

Special pricing applies for multiple labels. Please advise Energy Enterprises if you have multiple recipes/labels, and a quote will be provided.
